

Preparing for downtown Main Street construction?

Have you met with a representative from MnDOT and/or the Hutchinson Chamber of Commerce?

Construction will start in the spring of 2020 and will last the entire season. MnDOT and the Chamber have great information regarding timelines, construction sequencing, ADA compliance, etc. **If you haven't, now is the time to call for more information!**

Are you familiar with the detour route?

Downtown Main Street will be closed and there will be a official detour. There will be signage directing motorists to the downtown business district. **Access to businesses will be maintained during construction. Downtown Main Street will be accessible for businesses and residences, but the road is not open.**

Have you thought about how customers will access your business?

Please encourage customers to use your rear entrance, if possible. Sidewalks will be kept in place as long as possible, but there are times when front access will be unavailable. Have you contacted the EDA for programs to improve your rear access? If not, it's not too late. Please contact Miles at 320-234-4223 for more information.

Have you spoken with a city representative about your assessment?

The City of Hutchinson will be sending a letter and requesting time to speak with you regarding your assessment. In addition, an open house will be held to talk about assessments. Contact Kent Exner at 320-234-4212 for any questions about assessments.

For more information please contact:

Gene East, Project Manager
MnDOT District 8
320-214-6331 or gene.east@state.mn.us

Mary Hodson, President
Hutchinson Chamber of Commerce & Tourism
