

Highway 15 Hutchinson Project

Project summary

MnDOT will reconstruct Highway 15/Main Street from 2nd Ave., near the South Fork Crow River Bridge, to 5th Ave. S due to deteriorating pavement. Sidewalks and pedestrian crossings will be upgraded to meet Americans with Disabilities Act (ADA) standards. The City of Hutchinson will be replacing utilities (sanitary sewer & water) in downtown Hutchinson under Highway 15/Main Street. **This work will require a detour.**

In addition to the reconstruction of Highway 15/Main Street, the pavement from 5th Ave. S to just north of the roundabout at CR 115 (Airport Road) will be resurfaced. Current sidewalk and pedestrian crossings along this area will be upgraded to meet ADA standards. A north bound left turn lane at Linden Ave. will also be added. **This work will be done under traffic and will not require a detour.**

Both projects are scheduled for the 2020 construction season.

Project benefits

- Smoother road surface
- Modernize sanitary sewer and water
- Help ensure the city and state infrastructure will continue to serve their purpose for many years

Project detour

- CR 115 (Airport Road) to Highway 22 to Highway 7

Project cost

- \$6.5 million (state costs only)

Project timeline

- Preliminary design – 2017/2018
- Environmental review – 2017/2018
- Detailed design – 2018/2019
- Project bids due – 11/22/19
- Construction – 2020 construction season
